

ROHDE & SCHWARZ

Sponsor Presentation from Mike Faith

DIY Macropad Workshop

*Led by Ethan Tabler and Will McGloughlin
PSU IEEE 2021*

Sponsor presentation from Rohde and Schwarz

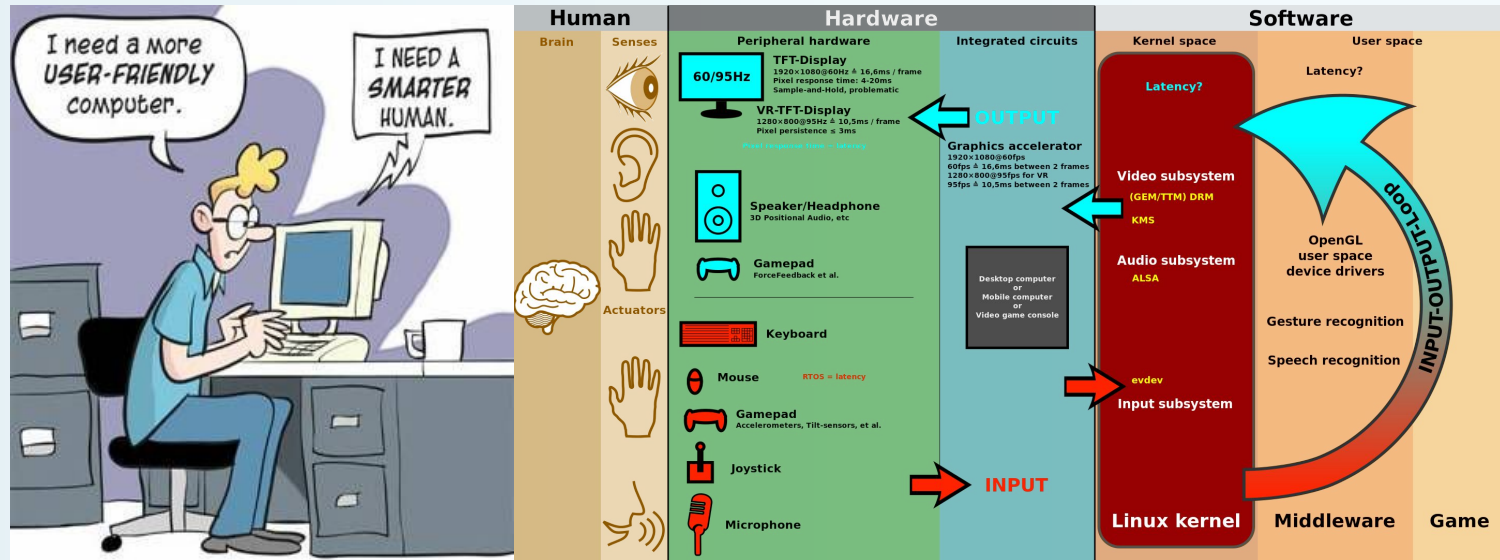

Intro to Macropads

- ▶ What is a macropad
- ▶ Potential uses
- ▶ What do other macropads look like

Interfacing with PCs

- ▶ Pro Micro
 - Made by SparkFun
 - Most widely available board in the Arduino ecosystem with **HID** support
 - Can send mouse and keystrokes

Original Prototype

- ▶ 4 buttons hooked up to an Arduino Pro Micro
- ▶ Macros were programmed into the board using the Arduino IDE
- ▶ Issues
 - Harder to program macros
 - Somewhat limited in scope of macros
- ▶ QMK was a much better solution

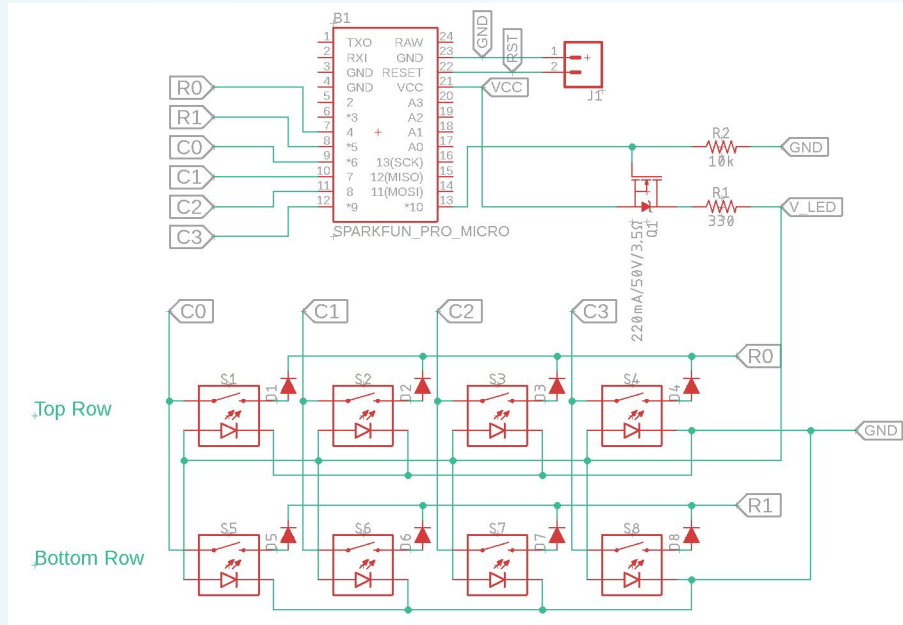

QMK

- ▶ What is QMK?
- ▶ What can you do with it?
- ▶ How do commercial boards use QMK?

QMK circuit design

- ▶ What does the circuit need in order to be QMK compatible
 - Matrix of keyswitches and diodes
 - Need to tell QMK which pins on pro micro correspond to each row and column of the matrix
 - In our setup, we do this with the online firmware builder
 - Lights(Optional)
 - Numlock
 - Backlight
 - Underglow
 - etc.

Our design

- ▶ 2x4 switch matrix
- ▶ Custom key mapping and pin setup (see gist)
- ▶ Firmware made with online tools
 - Layout for QMK
 - Make firmware from that layout
- ▶ Program pro micro like normal
 - See also: Elite-C
- ▶ Different keyswitches
 - Brown vs Yellow

WIRING
PINS
KEYMAP
MACROS
QUANTUM
SETTINGS
COMPILE

Change the number of rows and columns in the matrix.

Rows

Columns

Specify the diode direction.

Column to Row

Our design

- ▶ 2x4 switch matrix
- ▶ Custom key mapping and pin setup (see gist)
- ▶ Firmware made with online tools
 - Layout for QMK
 - Make firmware from that layout
- ▶ Program pro micro with QMK Toolkit
 - See also: Elite-C
- ▶ Different keyswitches
 - Brown vs Yellow
